Objective

Courteous and enthusiastic. I am interested in IT and everything in its orbit. I recently began to be fascinated by web programming, e.g. developing apps and building websites. As this area complements my studies, I am keen to gain more experience in the field. For this reason, I am looking for a company willing to offer me a placement among their developers. In return, I would offer my full commitment, and be a pleasant and friendly addition to your team. I am therefore currently looking for a position as a front-end developer.

Interest

Digital Tools & Technical Skills

- HTML5, CSS3, JavaScript, ReactJS, Redux, Github, Figma, NextJS, TypeScript, NodeJs, Cypress Testing Visual Studio, Trello, Material UI & much more.

Abilities

- A strong individual contributor while also being a team player.
- Experience working in Agile methodology.
- I Have deep passion for technology with a strong focus on modern web technology stacks
- Develop new features and work on defect fixes on the Front End Side.
- Highly self-motivated and adaptable to learning and understanding new technologies.

Education

Hyper Island 2019 - 2021
Studied Frontend Development

Hyper Island gave me the foundation to approach creative challenges in a effective manner. I gained an understanding of team dynamics and how to manage processes and culture. Focusing on how to work in order to optimise creativity and feedback within each team.

Davenport University, (Dearborn, Michigan).
B.A in Finance.
2001 to 2004.

I studied Finance & Banking in Davenport University. I learned about how Financial system works. I learned accounts receivable and accounts payable, taxation, Investment banking and varies other Financial courses.

Cody High School, (Detroit, Michigan).
1999 to 2001.

Internship

NewGenia Sep-2020 to April-2021

My Mentor was Shahan Khan

info@newgenia.com

newGenia, a business segment of Chrom 1 AB, specializes in building tools and services that enable faster, cheaper, secure DNA analysis in a modular way.

For an internship at newGenia, using the Agile methodology I was able to use the knowledge that I have gain from Hyper Island and use that to help newGenia make improvements in its quest to help the healthcare industry.

I was able to work on a project where I have to build Login authentication, File upload system to AWS, Use Figma to design Website, and built components with re-useability.

In this process, I was able to gain knowledge in some different technology such as C#, Blazor, Dotnet, AWS, and some other back-end technology.

Freelance Work

I have been doing freelance work for more than 2 years Building website for small Businesses. Here are some of the website that I have build for these business.

Jamaican food website

As a freelancer, I have designed and built a website for my clients. The process starts with sitting down with a client and listening to their ideas and turning those ideas into beautiful websites. I have made a Jamaican food website for a client. which they liked.

Here is the link for website:

<https://authentic-jamaica-iy3zzddad-nayab007.vercel.app/>

Organic Coffee Store

For this project, I have made a website where my client can sell their coffee products. The client gave me instructions that I have to build website with a forest theme with a video background. I deliver that for them and they were very please with the result. here is the Github repo for that.
